In the following list the numbered streets are arranged in numerical order followed by the named streets in alphabetical order, the intersecting streets being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupants or houseowner or tenant. In the business blocks containing offices the occupants are shown by room numbers where practicable, in apartment homes the number denotes the number of the apartment. In all streets both sides of the street are included in one list. The profession or business of individuals or firms is given only at their respective place of business; to find occupation of others refer to Alphabetical List of Names.

By the decimal system of numbering one hundred numbers are allotted to each square. The center of the city for street numbering purposes is at the junction of Washington avenue and Michigan street. Streets running north and south are numbered north and south from Washington avenue, while those running east and west are numbered east and west from Michigan street. The numbers begin with 101 and alternate from one side of the street to the other. Each square begins with an additional hundred; thus, 101, 201, etc. In some instances the blocks are longer, there being no intersecting streets, and the numbers then run higher. The odd numbers are on the north side of the streets running east and west, and on the west side of the streets running north and south. All other streets not commencing at Washington avenue or Michigan street are numbered in accordance with this system.

The symbol © following a householder's name indicates that we have received information during the canvass that the house is owned by some member of the family, but as the publisher cannot and does not guarantee the correctness of the information furnished, nor the complete absence of mistakes no responsibility for errors can be or is assumed, nor can the publisher furnish further information than that shown.

Telephone numbers, as supplied to us on our canvass are shown opposite names and some street intersections, are merely for the guidance of the publishers, and have no other significance.)

(This section includes some listings reading "No Return." In each case the Publishers tried diligently, by various means, to obtain the information for the occupants but were unsuccessful. First, two personal calls were made by an enumerator, next, a double postal card was mailed and the telephone used when possible.)
